Home Use / Self Test Approval Confirmation

Dear James

As you are aware, the Hughes Healthcare Rapid Nasal Antigen test was officially granted approval for Home Use / Self-Testing on 14th May 2021 by recognised, Notified Body, TUV SUD, Germany under CE 0123.

This letter is to confirm that, whilst our home use packaging is in production (due to be in general circulation by 26th June) all tests provided to you in packaging labelled 'For Professional Use' are indeed Approved for Home Use / Self-Test. It is simply a matter of delay in Self-Test packaging. During this interim period, please provide a copy of this letter along with a copy of the TUV SUD Approval Certification to all customers. We will of course be happy to replace any 'Professional Use' test kit packaging as soon as the Self-Test boxes arrive. We thank you for your understanding and patience during this transition period.

Kind Regards

Dan
